ROAD DEPARTMENT OF GEORGIAN MINISTRY OF REGIONAL DEVELOPMENT AND INFRASTRUCTURE

CONTRACT: #SLRP III/CS/QCBS-01

PREPARATION OF DETAILED DESIGN AND BIDDING DOCUMENTS FOR REHABILITATION OF 10 ROAD (Approx. 100 km) SECTIONS UNDER THE THIRD SECONDARY AND LOCAL ROADS PROJECT (SLRPIII)

Road Name: Local Access Road to Village Tolebi, L=4.3km

Road No.9, Stage II, Under the Terms of Reference

Environmental And Social Management Plan VOLUME VI

CONSULTANT:

SUB-CONSULTANT:

PA RT I: GENERAL PROJECT AND SITE INFORMATION

INSTITUTION	AL & ADMINISTRATIVE				
Country	Georgia				
Project title	Rehabilitation of Local Access Road to Village Tolebi, Section of km 0 ~ km 4.5				
Scope of project and activity	Many parts of exposed gravel surface and asphalt pavement surface are damaged i.e., plastic deformation, pot holes due to the traffic / environmental condition, and stagnant water at surface layer. Providing of asphalt surface layer is essential to recover road function in terms of driving convenience and driving safety. Existing pipes are of reinforced concrete. Most of existing pipes shall be repalced with new pipes due to the				
	insufficient capacity and dysfo	unctionality.			
	The traffic facilities such as road signs, pencing, bus staion, and etc. shall be provieded and replaced with new ones since there are not existed appropriate traffic safety facilities to minimize traffic accidents. General information of detailed design for rehabilitation work is as follows:				
	Design speed: 40 km/hWidth of carriageway: 4Width of Shoulder: 0.5				
	- Number of carriageway				
	- Pavement thickness: As	sphalt layer (5cm), Stabilizatio	on layer (16cm)

		Supervision Direction"			
SITE DESCRIP	TION	Merab Jishiashvili			
Name of site	Local Access Road to Village It is located in Imereti region				
Describe site location	Local access road to Tolebi vil Crigoleti road. The ending s at 6 km. It passes through 2 vi total length of project road is	section of this road connects S illages (Vazisubani villages an	ajavakho ~ Chokhataur	i ~ Ozurgeti ~ Kobuleti road	
Who owns the land?	Samtredia municipality and S Agency of the Ministry of En	tate forest fund territories (110 vironment and Natural Resour		by theNational Forest	
Description of geographic, physical, biological, geological, hydrographic and socioeconomic	Location: The project road is located in Imereti region and passes through the territory of Samtredia municipality. Absolute level of road varies between 20.5m ~ 46.3 m. From geo-technical point of view, project area belongs to Guria sub-zone of Ajara-Trialeti wrinkled system northern zone There are no geotechnical instabilitits observed on the project road. According to the seismic zoning the study area belongs to the 8 point earthquake zone. Climate of project area is identified as a hot weather in summer season and short, mild weather in winter period. River Khevistskali runs nearby (left side) of the road on several sections. Air: Air quality in the project area is good due to low traffic levels and the absence of industrial facilities.				
context	Water and Soil: No pollution	n is reported.			
	<u>Flora</u> : Within the territory currently under the State Forest Fund, the following tree species are registered: Platanus-7 specimens: Ficus Carica-1 specimen and Alnus-3 specimens. There are no Red Listed species within the project impact zone.				
	Fauna: The project road pass is presented by the species who project the impact on the faun	hich does not need any specia			
	Noise - The current noise levactivities will have modest im and this impact will be limited	pact on those people who resi

	H. Risk of unexploded ordinance (UXO)	[] Yes [x] No	If "Yes", see Section 3- G		
	I. Traffic and Pedestrian Safety	[x] Yes [] No	'Yes", see Section 3- H		

--

¹ Land acquisition includes displacement of residents, change the way of life, this is concerning with land which was purchased/handed over and impact on persons living and/or unlawfully exist and or/performing business activities (Booths) on the land already purchased.

²Hazardous or toxic materials contain, but is not limited to: asbestos, toxic paints, hazardous dissolvent materials, removal of lead containing materials and etc.

PART III: MITIGATION MEASURES

ACTIVITY	PARAMETER	MITIGATION MEASURES CHECKLIST	
0. General Conditions	Notification and Worker Safety	 a) The local construction and environment inspectorates and communities have been notified of upcoming activities b) The public has been notified of the works through appropriate notification in the media and/or at publicly accessible sites (including the site of the works) c) All legally required permits have been acquired for construction and/or rehabilitation d) The Contractor formally agrees that all work will be carried out in a safe and disciplined manner designed to minimize impacts on neighboring residents and environment. e) Workers' PPE will comply with international good practice (always hardhats, as needed masks and safety glasses, harnesses and safety boots) f) Appropriate signposting of the sites will inform workers of key rules and regulations to follow. 	
A. General Rehabilitation and /or Construction Activities	Air Quality	 a) During excavation works dust control measures shall be employed, e.g. by spraying and moistening the ground b) Demolition debris, excavated soil and aggregates shall be kept in controlled area and sprayed with water mist to reduce debris dust c) During pneumatic drilling or breaking of pavement and foundations dust shall be suppressed by ongoing water spraying and/or installing dust screen enclosures at site d) The surrounding environment (sidewalks, roads) shall be kept free of soil and debris to minimize dust e) There will be no open burning of construction / waste material at the site f) All machinery will fit emission originating regulations, well maintained and serviced and there will be no excessive idling of construction vehicles at sites 	
	Noise	 a) Construction noise will be limited to restricted times agreed to in the permit b) During operations the engine covers of generators, air compressors and other powered mechanical equipment shall be closed, and equipment placed as far away from residential areas as possible 	
	Water Quality	a) The site will establish appropriate erosion and sediment control measures such as e.g. hay bales and / or silt fences to prevent sediment from moving off site and causing excessive turbidity in canalization and nearby streams and rivers	
	Waste management	 a) Waste collection and disposal pathways and sites will be identified for all major waste types expected from excavation, demolition and construction activities. b) Mineral construction and demolition wastes will be separated from general refuse, organic, liquid and chemical wastes by on-site sorting and stored in appropriate containers. c) Construction waste will be collected and disposed by licensed company d) In order to control waste disposal accuracy and compliance, waste disposal reports shall be done e) Whenever feasible Contractor will reuse and recycle appropriate and viable materials (except when containing asbestos) 	
B. Impacts on surface drainage system	Water Quality	 a) There will be no unregulated extraction of groundwater, nor uncontrolled discharge of process waters, cement slurries, or any other conwaters into the ground or adjacent streams or rivers; contractor should obtain all necessary licenses and permits for water extraction and pouring out of used water in state current water system b) There will be proper storm water drainage systems installed and care taken not to silt, pollute, block or otherwise negatively impact nature rivers, ponds and lakes by construction activities. 	

		c) There will be procedures for prevention of and response to accidental spills of fuels, lubricants and other toxic or noxious substances.d) Construction vehicles and machinery will be washed only in designated areas where runoff will not pollute natural surface water bodies.
C. Historic building (s)	Cultural Heritage	a) If construction works takes place to a designated historic structures or are located in a designated historic district, notification shall be made and approval/permits be obtained from local authorities and all construction activities planned and carried out in line with local and national regulation
		b) It shall be ensured, that provisions are put in place so that artifacts or other possible " chance finds" encountered in excavation or construction are noted and registered, responsible officials contacted and work activities delayed or account for such finds
D. Acquisition of land	Land Acquisition Plan/Framework	a) If expropriation of land was not expected but is required, or if loss of access to income of legal or illegal users of land was not expected but may occur, that the Bank's Task Team Leader shall be immediately consulted.
		b) The approved Land Acquisition Plan/Framework (if required by the project) will be implemented
E. Toxic materials	Asbestos management	a) If asbestos is located on the project site, it shall be marked clearly as hazardous material
		b) When possible of asbestos will be appropriately contained and sealed to minimize exposure
		c) Asbestos prior to removal (If necessary) will be treated with a wetting agent to minimize asbestos dust
		d) Asbestos will be handed and disposed by skilled & experienced professionals
		e) If asbestos material is stored temporarily, the waste should be securely enclosed inside closed container and marked appropriately. Security measures will be taken against unauthorized removal from the site.
		f) Removal of asbestos will not be reused
	Toxic / hazardous waste management	a) Temporarily storage on site of all hazardous or toxic substances will be in safe containers labeled with details of composition, properties and handling information
		b)Containers of hazardous substances shall be placed in an leak-proof container to prevent spillage
		c) Waste shall be transported by specially licensed carriers and disposed in licensed facility
		d) Paints with toxic ingredients or solvents or lead-based paints will not be used
F. Affected forests, wetlands and/or protected areas	Ecosystem protection	a) Works within the territory of the State Forest Fund are disallowed prior to completion of de-listing and user right transfer to this territory from the National Forest Agency to the RD
		b) Tree cutting must be held down to minimum by adjusting alignment of access roads, using small machinery or manual labor in individual locations, etc.
		c) All trees that have to be extracted must be marked and their removal must be entered into tree-cutting ledger on daily basis
G. Risk of unexploded ordinance (UXO)	Hazard to human health and safety	a) Before to start any excavation activities, Contractor shall verify that the construction area has been checked and cleared regarding UXO by appropriate authorities
H. Traffic and pedestrian safety	Direct or indirect hazards to public	a) In compliance with national regulations the Contractor will insure that the construction site is properly secured and construction related traffic regulated. This includes but is not limited to
	traffic and pedestrians	Signposting, warning signs, barriers and traffic diversions: site will be clearly visible and the public warned of all potential hazards
	by construction activities	 Traffic management system and staff training, especially for site access and near-site heavy traffic. Provision of safe passages and crossings for pedestrians where construction traffic interferes.
		Adjustment of working hours to local traffic patterns, e.g. avoiding major transport activities during rush hours or times of livestock movement
		If required, active traffic management by trained staff at the site for safe passage for the public
		Ensuring safe and continuous access to all adjacent office facilities, shops and residences during construction

PART IV: MONITORING PLAN

Construction Phase

Activity	What (Is the parameter to be monitored?)	Where (Is the parameter to be monitored?)	How (Is the parameter to be monitored?)	When (Define the frequency / or continuous?)	Why (Is the parameter being monitored?)	Who (Is responsible for monitoring?)
Supply of construction materials	Purchase of the construction materials from licensed providers	Offices and warehouses of material suppliers, and borrowing sites	Checking documents; Inspection of material quality	In the process of signing the agreements for material provision	Ensure technical quality of construction; Protect human health and environment	Roads Department (RD)
Works in the forested territory	No physical activity takes place in the territory of the State Forest Fund until de-listing and user right transfer procedures are complete Movement of construction vehicles and machinery, storage, or other activities do not damage and cause cutting of trees unless tree extraction is required for arranging road surface and shoulders Threes that must be extracted are labeled prior to removal and each extracted tree is entered into the tree cutting	Work site within forested territory Construction contractor's office	Checking documents Visual observation	Prior and in the course of works within the forested territory	Ensure compliance with the national legislation; Minimize impact on forested area; Facilitate procedure of hand over of loggs generated through tree cutting	RD

	ledger (species and diameter identified)					
Transportation of construction materials and waste Movement of construction equipment	Technical condition of construction vehicles and machinery; Adequacy of the loading trucks for transported types of cargo, and canopy coverage of cargo transported in open trucks; Movement of construction vehicles and machinery along pre-defined routes.	Routes for transportation of construction materials and construction wastes	Inspection of roads adjacent to the construction site and included in the agreed-upon routes of transportation	Unannounced checks during the working hours	Avoid air and road pollution eith dust and solid matter; Reduce traffic disruption	RD; Traffic Police
Contamination of surface water during rehabilitation of the bridge on the Khevistskali river.	Suspended solids, organic compounds, lubricants, fuel, solvents, heavy metals, pH value, mineral oils	Rehabilitation of the bridge	Inspection	During rehabilitation works near in the water . Unannounced inspections during works near watercourses	Reduce water pollution caused by equipment operation;	RD
Operation of Construction machinery on site	Proper technical condition of construction machinery: • no excessive exhaust, • no fuel leakage, • respect of working hours • no damage to trees and other vegetation what does not need to be creared for the purposes for road construction	Construction site	Inspection	Within and off working hours	Reduce air and soil pollution caused by equipment operation; Reduce noise and dust nuisance to local population	RD

Servicing of construction	Washing vehicles and	Construction site and	Inspection	Entire period of	Avoid land and water	RD

	wash area.					

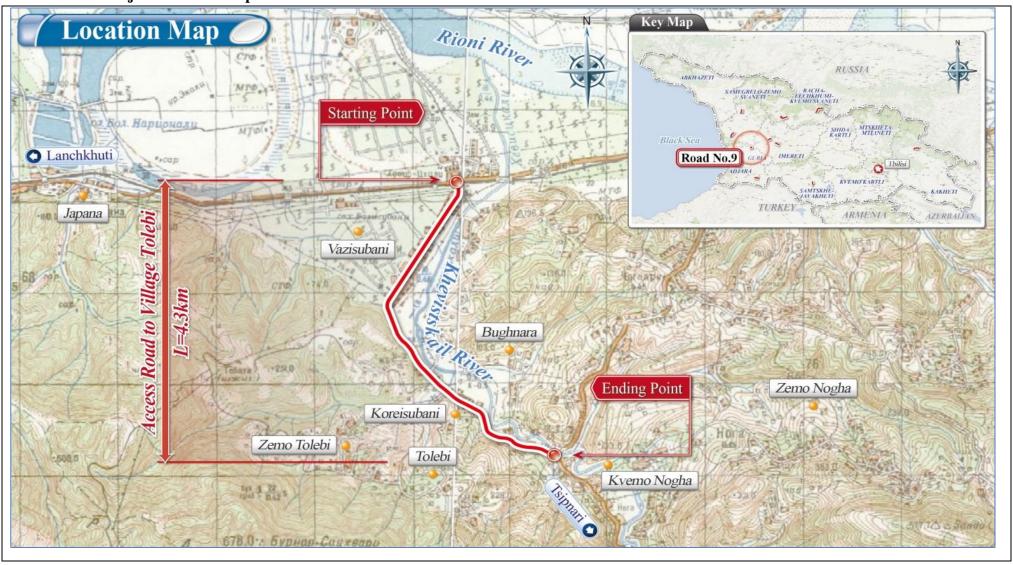

Extraction of inert material Generation of	Purchase of inert material from the existing providers if possible; Obtaining license for extraction of material by the Contractor and strict adherence to the terms of such license; Terrace processing of the borrow pits, backfilling of excess material, and harmonization with landscape; River bed gravel extraction away from water flow, arrangement of gravel barriers for isolating extraction area from water flow, prevention of water flow entry by vehicles and machinery; Demarcation of borrow areas with warning signs Temporary storage of inert and	Borrow areas Construction site and	Checking documents Inspection of activities Checking documents;	The period of material extraction Entire period of	Reduce slope erosion and damage to the ecosystem and landscape; Reduce river bank erosion, water pollution with suspended particles, and impact on the aquatic life; Protection of animals and people from accidents	RD National Environment Agency of the Ministry of Environment and Natural Resources Protection
construction waste	hazardous wastes separately at the designated locations; Timely disposal of waste to the formally designated landfills; Hand-over of hazardous wastes to licensed deactivating and processing companies.	base (if applicable); Locations designated for waste disposal	Visual observation	construction	environment	Samtredia Municipality
Accumulation of household waste	Provision of waste containers on-site; Agreement with local municipality for regular outtransporting of waste	Construction site and base (if applicable)	Visual inspection	Entire period of construction	Avoid pollution of soil and water with household waste	RD; Samtredia Municipality
Generation of liquid waste	Arrangement and operation of toilets compliant with sanitary norms on-site;	Construction site and base (if applicable)	Visual inspection	Entire period of construction	Avoid flooding of construction site and base;	RD

	Arrangement of drainage system for storm water collection and periodic cleaning of the system from silt; Arrangement of sedimentation pool for waste water collection on-site			Increased frequency of inspection in periods of high precipitation	Reduce pollution of surface and ground water	
Operation of asphalt- concrete plant	Obtaining permit for impacting environment by Contractor and strict adherence to its terms; Placement of plant in the location permissive for minimal disturbance of local population; Arranging sedimentation pool for capturing of liquid discharges from plant	Construction site and base (if applicable)	Checking documents Inspection	Before establishment of plant and during entire period of its operation	Reduce inconvenience for local population due to plant operation; Reduce air and surface water pollution from emissions and discharges from plant	RD; National Environment Agency
Safety of labor	Provision of Special Clothes and protective means for the contractors Consistency with the rules of exploitation of the construction equipment and usage of private safety means	Construction site	Inspection of the activities	The whole construction period	Reduce the probability of accidents	RD

Operation Phase

Activity	What	Where	How	When	Why	Who
Activity	(Is the parameter to be monitored?)	(Is the parameter to be monitored?)	(Is the parameter to be monitored?)	(Define the frequency / or continuous?)	(Is the parameter being monitored?)	(Is responsible for monitoring?)
Cleaning road surface and shoulders from waste	Trash deposited from moving vehicles timely colleacted and removed; Bodies of animals overrun by vehicles timely collected and removed	Carriageway and shoulders of the road section	Inspection	Quarterly	Prevent road littering; Road safety	Samtredia municipality
Keeping road drainage system operational	Periodic cleaning of drainageditches from silt and trash	Drainage system long the road section	Inspection	Quarterly	Maintaining drainage system capacity for preventing road flooding and water damage	Samtredia municipality
Confinement of accidental spills and clean-up	Timely confinement, deactivation, and removal of liquid or powder spills of cargo in case of road accidents	On the road and its immediate surroundings	Inspection	Upon occurenace of accidents, as required	Prevent pollution of soil and water	Traffic Police; Samtredia municipality
Disposal of waste from regular road maintenance works	Collection and timely disposal of waste from maintenance works to the designated landfill	On the road and its immediate surroundings	Inspection	Towards completion of scheduled maintenance works	Prevent enviornment pollution	Samtredia municipality

Attachment 1: Project Location Map

Attachment 2: Minutes of Public Consultation Meeting

MINUTES

of public consultation meeting on Environmental Management plan for Local Access Road to Village Tolebi, 0.0km -4.3km

11.02.2016

Tolebi Municipality

Chairman of meeting - Gia Sopadze, Head of Environment Protection Unit, Resettlement and Environment Protection Division

Secretary of meeting - Maya Vashakidze, Environmental Consultant Roads Department of Georgia

Speakers: Gia Sopadze, Maya Vashakidze

Attendees of the Meeting: See attachment 1

The goal of the public discussion was to inform the local communities about the purpose of the upcoming works, their timeline; temporary inconvenience expected from the construction works; and planned measures for mitigating the expected negative environmental impact.

Local stakeholders had possibility to ask questions and express their opinion during the public discussion, so that their comments could have been considered in the final version of the Environmental Management Plan.

Mr. Gia Sophadze, Head of Environment Protection Unit, Resettlement and Environment Protection Division and Ms. Maya Vashakidze, Environmental Consultant were representatives of the Roads Department of Georgia.

Mr. Gia Sophadze and Ms. Maya Vashakidze informed attendees about the Environmental Management Plan of rehabilitation works under Secondary and Local Roads project.

Mr. Gia Sophadze opened the meeting and informed attendees about the roads construction on the territory of municipality, also was discussed the meaning of Secondary and Local Roads rehabilitation project for Georgian economic development.

Ms. Maya Vashakidze made a presentation of Environmental Management Plan. She covered the scope of planned works, their possible impact on the natural environment and human health. Also was overviewed mitigation measures proposed to reduce negative environmental impacts of the project in the construction and operation phases.

Nº	Question	Answer
1.	When will the rehabilitation works of the road start?	The tender procedures are about to finish, the approximate time is spring

2.	How will the dust problem reduced during the rehabilitation works?	The company who will be implementing the rehabilitation works is obliged to prevent dust prevention by watering the territory		
3.	Will the local population employed during the rehabilitation works?	The local population will be employed during the construction works. Works contractor will be hired on the competitive basis and will have a discretion to recruit work force upon own discretion.		
		The Construction Company's contract will envisage the prioritized employment of the locals and supervision Company and local authorities will take care that these conditions are met.		
4.	Will local population have asphalt entrance?	The asphalt entrance will be arranged only for the population who live along the rehabilitation road section		

Irakli Litanishvili

Deputy Chairman, Roads Departments of Georgia

ბრძანება No-119

ქ. თზილისი

18 / ივლისი / 2013 წ.

სს ,.არქეოპოლისი"-ს ასფალტის წარმოებაზე გარემოზე ზემოქმედების ნებართვის გაცემის შესაბებ

..ლიცენზიებისა და ნებართვეზის შესახებ" საქართველოს კანონის 24-ე მუხლის მე-4 პუნქტისა და "გარემოზე "სენოქმედების ნებართვის შესახებ" საქართველოს კანონის მე-4 მუხლის პირველი პუნქტის ..გ" ქვეპუნქტის საფუძველზე

ებრძანებ:

 გაიცეს სს "არქეოპოლისი"-ზე გარემოზე ზემოქმედების ნებართვა - ასფალტის წარმოებაზე, სენაკის მუნიციპალიტეტში, სოფელ შველ სენაკში;

6ეჩართვა გაიცეს განუსაზღვრელი ვადით;

 ნეგართვის მფლობელმა უზრუნველყოს ეკოლოგიური ექსპერტიზის დასკვნით (№34: 15.07.13%) გათვალოსწინებული სანებართვო პირობების შესრულება;

ეს ხრმანება დატყოვნებლივ გაეგზავნოს სს "არქეოპოლისი"-ს;

5. ბრძანება ძალაში შევიდეს სს "არქეოპოლისი"-ს მიერ ამ ბრძანების გაცნობისთანაცე:

 ეს ბრძისება შეიძლება გასაჩივრდეს საქართველოს მთავრობაში (თხილისი, ინგოროყვას ქ. №7) მისი ძალაშე შესვლიდან ერთი თვის ვადაში.

საფუძველი: გარემოზე ზემოქმედების ნეზართვების დეპარტამენტის უფროსის თაშარ შარაშიძის მოხსენებითი. პარათი: სს "არეტოპოლისი"-ს წერილი (N°1993; 27.06.13წ) ეცოლოგიური უქსპერტიზის დასკვმა (N°94; 15.07.13წ).
